

CINEFADE VARIND

DATASHEET

Cinefade effect

- Vary depth of field in one shot at constant exposure
 - Works with any camera and cinelens
-

VariND mode

- Neutral density range from ND.4 to ND1.9+
 - Remotely and dynamically controllable VariND whenever the camera is inaccessible
 - Directly adjustable in 1/3 stop increments without hand unit
 - Two high quality ARRI polarising filters
-

RotaPola mode

- Removable Static Polariser to separately control the Motorised Polariser
 - Remotely and dynamically adjustable polarisation angle to control reflection
-
