

STABILIZED HEADS – FILMOTECHNIC

FLIGHT HEAD 6S

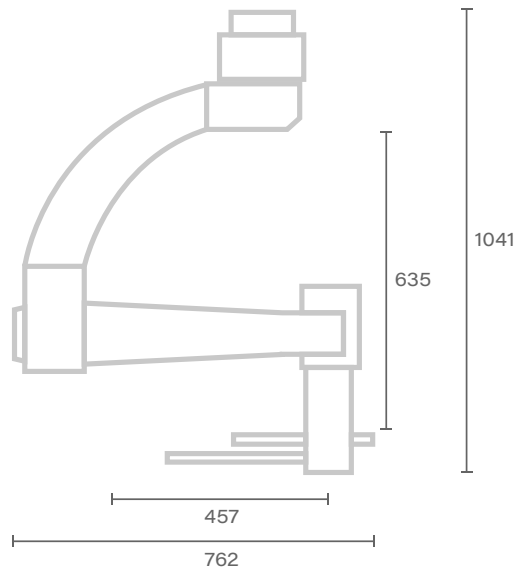

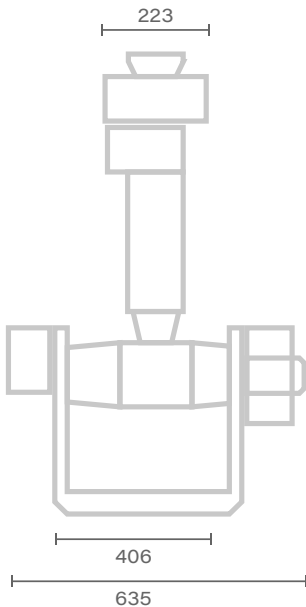

The Flight Head 6S is a stabilized head branded Filmotechnic that allows you to move the Roll 360 ° continuously without any limitation.

Improved in performance, Flight Head 6S can detect high speeds and adapt stabilization, it also boasts a strong Auto Horizon that supports high G force values. Like the previous versions, it is compact and allows an easy and quick installation of cameras and optics. It can be used on Crane, Dolly and Russian Arm, through joystick and wheels.
