

SCAFFOLDING LAYHER

The Layher universal scaffolding is a modular scaffolding with quick and easy assembly guaranteeing versatility and very high loads.

The particular junction plate on the upright allows the straight and diagonal modules to be fixed, eliminating movements and ensuring stability. On the same plane 8 connections are possible which allow a coupling at right angles and obtuse: to allow this quick assemblies and a construction.

DATASHEET

Available sizes	1,5 / 3 / 4,5 / 6 / 8 m	
Module components	4 Pillars 1 m	2 Plans
	4 Pillars 1,5 m	1 Plan with trapdoor
	6 Straight [Red]	4 Wheels
	6 Straight	4 Bases
	2 Straight a U	4 Starting elements
Stabilizers	4 Diagonals [Blue]	4 Safety plugs
	1 Straight 2 m	
	1 Diagonal 2,5 m	
	1 Base
