

MOTORIZED SLIDING SYSTEM – MOVIE PEOPLE

MEMORY

Memory S is the motorized sliding system designed and built by Movie People. Suitable for any type of production, this accessory allows precise movements both very slow and very fast and unlimited repetitions.

Simple to mount Memory can be configured on all GFM sliders and be ready to use in minutes. It can be equipped with a remote or stabilized head on which a wide variety of cameras and lenses can be mounted.

The operator, using his joystick, can move the trolley by adjusting the speed and the respective acceleration and deceleration ramps, obtaining fluid and natural movements. Memory also allows you to save the carriage positions in order to recreate a frame or a movement of the camera over and over again, with the possibility of changing the parameters at a later time.

DATASHEET

| | |
|--------------|-------------------------------|
| Payload | 30 kg |
| Power supply | Cable or Battery [V-Lock] |
| Slider | 70 / 100 / 120 / 140 / 180 cm |
| Max speed | 0.2 m/s |
| Min speed | 0.8 mm/s |
| Memories | 64 |

Save and repeat positions.

Thanks to the keyboard it is possible to memorize up to 64 positions on the X axis, thus creating almost infinite movements

Adjustable speeds and ramps.

The joystick can be used to adjust the movement speed and set acceleration and deceleration, it is also possible to reverse the movement of the carriage.
