

## SPECIAL VEHICLES – POLARIS

# RZR

Polaris RZR is a special high-performance vehicle that allows you to turn on the road in "off-road" mode and in the most extreme environmental situations thanks to the possibility of mounting a track system.

RZR is equipped w a system of monitors and intercoms dedicated to the director, the director of photography and the focus puller, it is possible to equip it w various cutting-edge shooting systems: U-Crane Mini, motorized sliders, shock absorber and stabilized heads.

Moreover, thanks to its rear platform it is possible to mount small modular cranes that can be used manually directly by the driver.
