

TELESCOPIC CRANE – TECHNOCRANE

SUPERTECHNO 50 PLUS

The Supertechno 50 Plus offers a multitude of new possibilities. With the aiming mode, various settings and image movements including pan, tilt, roll, zoom and focus can be saved and recalled if required. The technician can set precise end stops for the telescope directly on the camera crane. Two points in the room can also be defined directly on the telescope control, which then form a straight line. In plaining mode, the camera crane telescopes independently to keep the camera in a straight line.

TECHNICAL DATA

Max. optical height	1511 cm
Max. speed	200 cm/s
Max. telescopic movement	1130 cm
Breach length	366 cm
Total length	1843 cm
Weight	2520 kg
